

XCZ 100 -Lead and Mark Inspection Machine with Tape and Reel or Tube Output

SPECIFICATIONS:

Package	: SOP, TSSOP, MSOP, SOT, QFN, D2PAK, LEDs, Surface Mount Discrete Products, Leaded Rectifier etc
Option available	: 2D Lead Vision Inspection, 3DVision Inspection, 2D In-tape Vision Inspection, QFN Vision Inspection, 2nd or 3rd Tape & Reel
Input	: Stackable Tube Loader, Bowl Feeder
Output mode	: Tape & Reel, Tube
UPH	: 40,000 max
MTBA	: >30 mins
Air	: 6 kg/cm ²

DIMENSIONS:

At a UPH of 16,000, XCZ 100 could easily be one of the fastest Lead and Mark Inspection Machine with Tape and Reel or Tube output. The UPH is maintained for both Tape and Reel and Tube Output providing the clear competitive edge over a typical Gravity Feed System(GFS). In a typical GFS, the Tape and Reel UPH is obviously lower than the Tube output. Given the option of integrating the second or third Tape and Reel modules, non-stop operation is guarantee.

XCZ 100 is very versatile and could handle most of the packages in the electronics industry such as SOP, TSSOP, MSOP, SOT, QFN, D2PAK, LEDs, Surface Mount Discrete Products, and Leaded Rectifier. Customized packages are also possible.
